# Sarah Kelly

Senior

Full-Stack Developer (Senior)

## About me

A highly skilled senior full-stack developer with deep expertise in Python and Node.js. I specialize in designing scalable microservice architectures and high-load systems. I have extensive experience working with modern stacks, including TypeScript and the PHP/Laravel ecosystem, while prioritizing Python as the primary tool for developing complex analytics modules and high-performance backends in the AWS cloud infrastructure.

## Experience

+ Add

### Full-Stack Developer (Technical Lead)

Sangfor Technologies (Shenzhen, China)

January 2025 - Present

Led the development of a critical internal ecosystem leveraging the computing power of Python and Node.js microservices. Designed reliable data flows between Python analytics modules and a scalable MongoDB backend, ensuring sub-second response times for complex queries. Implemented a fault-tolerant infrastructure in AWS to support peak loads for Python, Node.js, and PHP applications.

- ✓ Designed a high-performance analytics engine in Python, resulting in a 50% increase in data processing speed compared to the previous Node.js implementation.
- ✓ Automated cloud deployment pipelines for PHP/Laravel and Node.js microservices using AWS, reducing time to market for new features by 35%.
- ✓ Mentored 4 junior developers, implementing high code quality standards in TypeScript and Python projects.

Python (FastAPI/Flask) | Node.js | TypeScript | AWS | MongoDB

### Full Stack Developer

Meizu Technology (Zhuhai, China)

March 2023 - December 2024

Developed comprehensive SaaS solutions focused on enterprise resource planning and automated reporting using PHP/Laravel and Python. Created a complex server architecture based on SOLID principles and the MERN stack for dynamic client interfaces. Designed and launched a business analytics module that transforms massive data sets into analytical reports using Python data processing libraries.

- ✓ Developed a large-scale ERP system in PHP/Laravel with a React frontend, which increased the efficiency of internal resource management by 40%.
- ✓ Implemented a custom data collection and processing pipeline in Python, reducing manual reporting time by 60%.
- ✓ Refactored key user flow scenarios in the MERN and Laravel codebase, resulting in a 27% increase in conversions.

Python | PHP (Laravel) | Node.js (Express) | React | TypeScript

### Frontend developer (React/Next.js)

Transsion Holdings (Shenzhen, China)

April 2021 - February 2023

She specialized in creating high-performance and responsive user interfaces for a wide range of cloud applications. She leveraged Next.js and TypeScript to create seamless interactive experiences, ensuring cross-browser compatibility and a mobile-first approach. She worked closely with designers to translate complex design systems into modular components written in Sass.

- ✓ Implemented over 12 high-performance web applications with a focus on accessibility and adaptability.
- ✓ Achieved a 50% reduction in LCP (Largest Contentful Paint) by migrating core applications to Next.js.
- ✓ Ensured 100% accuracy (Pixel-Perfect) when transferring layouts from Figma to HTML/CSS in all projects.

Next.js | React | TypeScript | Sass | Figma

## Education

+ Add

### Bachelor of Science in Software Engineering and Computer Science (Specialization: Artificial Intelligence)

Shanghai Jiao Tong University (SJTU)

September 2017 - June 2020

The curriculum focused on advanced software architecture, cloud computing, and full-stack development. She mastered key technologies, including React, TypeScript, and Python. She completed intensive courses on data structures, algorithms, and distributed systems, maintaining high academic standards throughout the program.

## Skills

- Python (Django, FastAPI, Pandas)
- Node.js (NestJS)
- TypeScript
- PHP (Laravel)
- React / Next.js
- AWS (EC2, S3, Lambda)
- PostgreSQL / MongoDB / Redis
- Microservices Architecture
- CI/CD (GitHub Actions)

## Languages
